Subject: Work stoppage on Superfund Management Assistance Grant projects

John:

Today I was notified by our CO that the grant that pays for providing assistance to USEPA on Superfund sites has been depleted. Therefore, please ask your staff to hold off on performing any ground water support work to DERR on the following sites:

Armco Hamilton
Behr
Cardington Rd LF
Chem-Dyne
East Troy Contaminated Aquifer
Lammers Barrel
Miami County Incinerator
Milford
New Carlisle LF
Peters Cartridge
Powell Rd LF
Pristine
Skinner LF
South Dayton Dump
Tremont Barrel Fill
United Scrap Lead
Valleycrest LF
West Troy Contaminated Aquifer

This moratorium is in effect until Monday, April 2nd when the our new grant cycle begins.

If something comes up in the meantime where DERR support on any of the above sites is necessary, please have your folks work with the respective DERR site coordinator and bring it to my attention. We'll see if we can pay for that support through other funds.

Thanks.
